◎ Outline of Conservatory

This conservatory is one of the largest and most impressive in Japan with a maximum height of 14.8m and a total floor area of 4,700m², and it displays a staggering 4,500 taxa. The conservatory is separated into seven sections, and it is possible to observe plants from various environments ranging from wet tropics to dry tropics, lowland to highland, and plants from temperate alpine environment. In addition, this conservatory offers collections of useful tropical plants, orchids and bromeliads, and opportunity to explore the nightlife of plants in the urban forest.

Welwitschia mirabilis *Epiphyllum oxypetalum* *Meconopsis betonicifolia* *Vriesea imperialis* *Grammatophyllum speciosum*

※Planting locations are subject to change. ※*Epiphyllum oxypetalum* will be on display only during flowering time

- ◎Total floor area / 4,694.25m²
